

UNWANTED MEDICATIONS?

CRUSH IT, DON'T FLUSH IT!

- 1** Pour medication into a sealable plastic bag and crush. Add water to dissolve.
- 2** Mix in coffee grounds or a similar material that will render the medication unrecognizable.
- 3** Seal the plastic bag and put it in the trash.
- 4** Remove and destroy ALL labels from all medication containers before recycling them.

Patients should ALWAYS refer to printed material accompanying their medication for specific instructions.
